Course Procedures

Schedule, Submissions, Tests, and Grades

General guidelines

- **Preparation.** Before the first session of a lab, read the handout and do its pre-laboratory exercises.
- **Attendance.** You must attend each session of your group. To attend a session of a different group, get the approval of the lead instructor.
- **Own work.** You can use AI tools and other sources. In the test, you must explain each line of your code.
- **Contact.** For a logistical problem, contact only the lead instructor, Yuval Harary (hararіy4@biu.ac.il). For a technical problem, or a problem with a lab or with the material, contact any of the instructors.

Schedule

The laboratory has three groups: two on Monday and one on Thursday (Table 1). You work with a partner.

Week	**Monday** 13:00 to 16:00 18:00 to 21:00	**Thursday** 13:00 to 16:00	Session	Test of	Code deadline	Note
1	12 October	15 October	Lab 0			
2	19 October	22 October	Lab 1			
3	26 October	29 October	Lab 1			Elections, 27 October
4	2 November	5 November	Lab 2	Lab 1	31 October	
5	9 November	12 November	Lab 2			
6	16 November	19 November	Make-up week			
7	23 November	26 November	Lab 3	Lab 2	21 November	
8	30 November	3 December	Lab 3			
9	7 December	10 December	No sessions			Hanukkah break, 4 to 7 December
10	14 December	17 December	Lab 4	Lab 3	12 December	
11	21 December	24 December	Lab 4			
12	28 December	31 December	Lab 5	Lab 4	26 December	
13	4 January	7 January	Lab 5			
14	11 January	14 January	Make-up week	Lab 5	9 January	

Table 1: The schedule, from October 2026 to January 2027.

Submission of the code

- At the end of each task, save a copy of `main.c` with the name `labXpartYtaskZ.c`. For example, the copy of Task B2 of Lab 1 is `lab1partBtask2.c`.
- At the top of the file, write the names of the two partners in a comment.
- Submit the copies of a lab in Lamda. You and your partner submit together.
- The deadline is 23:59 on the Saturday before the week of the test (Table 1).
- There are no extensions. A task with no file in Lamda at the deadline gets a grade of zero. The exceptions are in Make-up weeks.
- Lab 0 has no submission and no test.

Tests

- The test of a lab is in class, in the first session of the next lab (Table 1). The test of Lab 5 is in week 14.
- In the test, you run your submitted code on the board. You show each task to the teaching assistant. You answer questions about the measurements.
- Each student does the test alone.
- A test that you miss gets a grade of zero.

Grades

- Each of Labs 1 to 5 is 20% of your final grade.
- Your grade for a lab comes from your test. Each student gets a separate grade.
- Each session of a lab that you do not attend reduces the grade of that lab by 15 points.

Make-up weeks

Weeks 6 and 14 are make-up weeks (Table 1). They are for these students:

- Students who were on Miluim.
- Students who got an exceptional extension from the lead instructor.

If you are on Miluim, send the dates to the lead instructor by email before the code deadline of the lab.
